

Taking a ride around Mercedes 'Wall of Death'

Accelerated circular motion

A ride around Mercedes “Wall of Death”

Test-drive of Mercedes on the high-banked track (1984, Stuttgart)

- What is happening here? why the cars are not falling?
- Describe all the forces that act on cars/bus

A ride around Mercedes “Wall of Death”

Test-drive of Mercedes on the high-banked track (1984, Stuttgart)

- Why can't the bus drive at higher angles, as cars do?
- What could be the scales of the speed?
- Any other examples of such a tracks?
